HEALTH SYSTEM

CHEERS
TO YOUR
YEARS!

2022 EMPLOYEE SERVICE RECOGNITION

This year marks my 20th year at Community. While I reflect on the remarkable transformation in healthcare and at Community over my two decades, it pales in comparison to what the 18 team members celebrating 40 or 45 years of service have seen and accomplished.

And this year we celebrate Linda Lyons, Manager of Health Information Management, who has dedicated 50 years to serving the Valley through her work in healthcare. Linda joined us when we assumed operations of the County-run hospital in 1996 and was with us as we transitioned our Burn and Level 1 Trauma services from the then University Medical Center to Community Regional in 2007. She's seen records go from paper to digital, and witnessed Community's growth into the multi-campus health system we are today.

I am truly in awe of Linda, and all our honorees. You exemplify the merits of continuous learning and the adaptability constantly required in our profession. You're a part of our history and the foundation of our organization's future.

I'm filled with pride when I pore over this Service Awards yearbook and see breadth of your knowledge, contributions and service to the people of our Valley. I am honored to celebrate this special milestone with you and so grateful that you chose to grow your career here at Community.

Respectfully and with gratitude,

A handwritten signature in black ink that reads "Craig S. Castro". The signature is written in a cursive, flowing style.

50 YEARS

Linda Lyons

Manager Health Information Management

In the 50 years since she started in the file room at Valley Medical Center Linda has seen the transition from paper to electronic medical records. “I joke that back then we had stone tablets and pounded things out with a chisel.” When HIM began scanning documents into a computer, Linda loved being able to review and send from her desk rather than standing in front of a copy machine to print and fax hundreds of pages to insurance agencies.

Her bosses, Janet Chisholm and Janet Paul, say Linda embraced operational changes throughout the years and now manages a team of 40: “Her knowledge, skill set and history of the health record make her a valuable historian resource in regards to releasing patient information, regulatory requirements for HIM, chart completion and other responsibilities. She also has a great relationship with the Medical Staff, encouraging them with her quick wit to complete their records timely.”

What stands out to Linda aren’t the technological changes, but how medical records can help experts solve medical problems or even give families closure. She still recalls how her medical record detective work led her to a cemetery log book and eventually helped one family find their sibling’s

grave. It had been decades since their mother left the stillborn, premature baby at the hospital. “That made me feel good then and even now,” Linda says.

Recently Linda told her staff she had put in two weeks’ notice for retirement. She listened to their dismayed pleadings that they would need much more advance notice before she mischievously told them: “April’s Fool!” She has no plans to retire and when she does, she says she may take up transcribing doctors’ notes again because she enjoys the work so much.
